---

Ragan – Bob was able to talk with Jim Belke this morning. Jim stated that unfortunately, in his absence someone who was unfamiliar with the OCA RMP database gave out the incorrect information. Jim looked into the data and informed Bob that his numbers are similar to the numbers Bob has estimated.

Carl.. These are the numbers that Bob Goodfellow would provide if asked about the number of Ag ammonia facilities in RMP program. The West Fertilizer facility was an Ag Ammonia facility. Bob called OEM, Jim Belke and asked about the 6000/10000 figures and could not get verification on either. Belke indicated that they had recently given copies of the database of RMP facilities to some new outlets and indicated that they may be counting facilities differently (incorrectly)
